MBAH MOFFO JOSUE

Backend Developer | Java & Python SecOps

josuemoffo@gmail.com +237 691 733 919 Yaoundé, Cameroon
josuembah.ag-technologies.tech josue-mbah-moffo JosueMoffo

PROFESSIONAL PROFILE

Backend Developer focused on application security, I design reliable architectures with FastAPI, Spring Boot and Django. My work centers on data isolation (multi-tenant), access control and the integration of robust security mechanisms. I build scalable systems where security is not an option added at the end, but the starting point of the code.

PROFESSIONAL EXPERIENCE

Pre-Engineering Intern, Backend & DevOps

AG Technologies

06 Jul. - 05 Sep. 2026 Yaoundé, Cameroon

- Design and development of **AGT Infra**, an internal platform unifying the management of the company's servers and **Docker** containers (via **SSH**), replacing scattered manual interventions: continuous deployment, monitoring and integrated web console.
- Stack: **FastAPI**, **SQLAlchemy 2.0**, **PostgreSQL**, **React** / **TypeScript**, containerized with **Docker Compose**.
- Security: dynamic **RBAC** / **IBAC** access control, with a timestamped audit log of sensitive actions.

ADDITIONAL PROJECTS

Shuba : SaaS Marketplace

Software Architecture

- Multi-tenant Django SaaS platform: organizations, products, carts, payments and authentication.
- Business logic triggered by Django signals, with a scheduled command
- Strict data isolation and handling of concurrent transactions to guarantee integrity.

Monitoring & Intrusion Detection (IDS)

Security Expertise

- Virtualized infrastructure, monitored by Nagios (CPU, RAM, services) and protected by Snort.
- Custom IDS signatures to detect port scans, DDoS attacks and IP fragmentation.
- Centralized logging in MySQL for post-incident audit, with attack simulation via Scapy.

TECHNICAL SKILLS

Back-End

Python Java
Django FastAPI Spring Boot

Front-End

JavaScript TypeScript
React Next.js Tailwind CSS

Infrastructure, Security & SecOps

Docker Linux RBAC / IBAC
Wireshark Snort
Nagios Netdata Monitoring & Logs

Databases

MySQL PostgreSQL

Design, Tools & Methods

UML REST API
Agile/Scrum CI/CD Git

ADDITIONAL TRAINING

Application & Network Security
Hands-on rooms on **TryHackMe** (OWASP Top 10 principles, Introduction to security)

Protocols & Web
TCP/IP model, HTTP requests, DNS, and Linux system fundamentals (**TryHackMe** / **OpenClassrooms**)

LANGUAGES

French
English

French: Native language
English: Technical

EDUCATION

Engineering Degree in Computer Engineering

National Advanced School of Engineering of Yaoundé (ENSPY)

In progress: 5th year

Mathematics (First-Year University Level / L1)

University of Yaoundé I

Oct. 2021 - Jul. 2022
